

Lecture Room

MG 101

Ms. Excel in Education

Ms. Office Excel

- Is a spreadsheet component of the Microsoft Office Suite.
- Ms. Excel runs in Windows OS
- Used to Enter, edit, format & sort data
- Also, perform mathematical/logical computations, and process numeric data

Ms. Office Excel

○ Start Ms. Excel

- ✓ Press windows Key  on the Keyboard
- ✓ Write “*excel*”: Installed Ms. Excel will be displayed in the start menu
- ✓ Click it to start

Ms. Office Excel

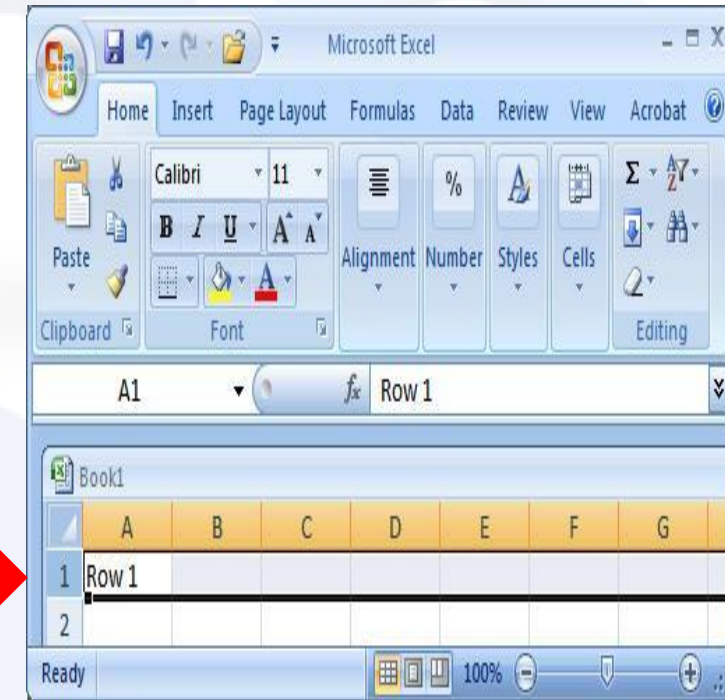

- Terminologies:
- ✓ Title bar, Menu bar, Formatting tool bars
- ✓ Formula bar, function Wizard $f(x)$
- ✓ Worksheet, Workbook

Ms. Office Excel

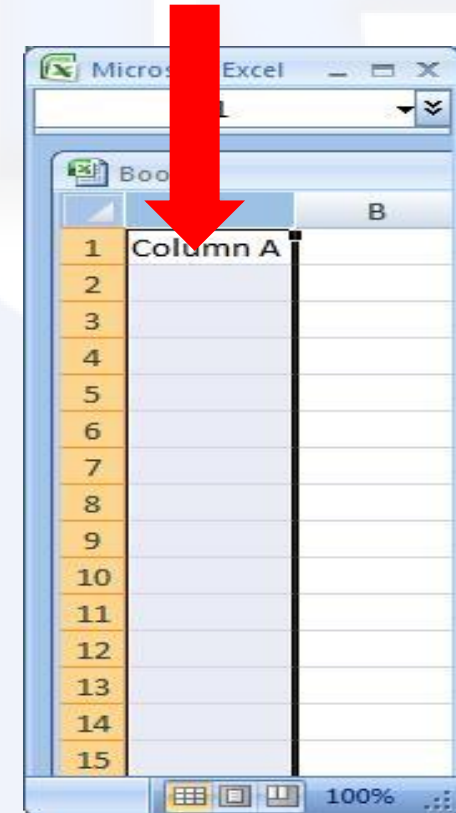

- Terminologies:
- ✓ **Rows** horizontal bars
- ✓ They are identified by **numbers** along the side of the sheet.

Ms. Office Excel

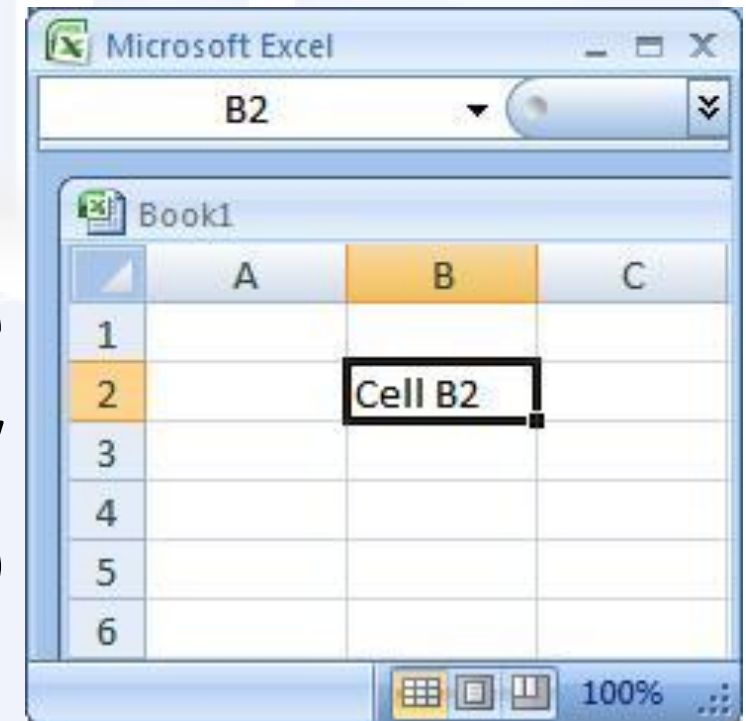

- Terminologies:
- ✓ **Columns** vertical bars
- ✓ Identified by letters across the top of the sheet

Ms. Office Excel

- Terminologies:
- ✓ **Cells** the intersection between a column and a row.
- ✓ Each cell is named for the column letter and row number that intersect to make it eg. B2, D2, G12

Ms. Office Excel

- Terminologies:
- ✓ **Cell reference/cell address** a combination of a column letter and row number which identifies a cell
- ✓ In Ms. Excel formulae, cells are represented by their cell addresses

Ms. Office Excel

○ Data entry in Ms. Excel Worksheet

Three ways

- i. Select a cell and directly type into the cell
- ii. Select a cell and type in the formula bar
(next to )
- iii. Use Data Entry Form

NB: **i & ii** will be covered in this class

Ms. Office Excel

- Text alignment
 - ✓ Text in Ms. Excel can be made to orient to a certain direction/angle
 - ✓ Try it now

Ms. Office Excel

- SN & Mathematical operations in Ms. Excel
- Any mathematical operation, formula or function in Ms. Excel is preceded by equal (=) sign
 - ✓ Addition (+), Subtraction (-), Multiplication (*), Division (/)
 - ✓ Try to add, subtract, multiply, divide
 - ✓ Eg. =20+10, =20-10, =20*10, =20/10
 - ✓ Video: <https://youtu.be/yKr5MGZJhGs>

Ms. Office Excel

- Processing students results
 - ✓ Total Marks, Average, Rank (Position)
 - ✓ Grade, Remarks
 - ✓ Division
 - ✓ Count Grades using *COUNTIF* function

Ms. Office Excel

○ Total/sum

=SUM(C2:G2)

✓ Video live at
<https://youtu.be/yKr5MGZJhGs>

12	11	SERAFIN KIMONGE	43	45	43	65	76	272	54	8

Ms. Office Excel

- Insert columns or rows in the Ms. Excel Worksheet
- Right click at a letter or number which represents a column or row. Then select insert

Ms. Office Excel

- Other terminologies
- ✓ **Values**-Numeric entries used for calculations
- ✓ **Labels**- texts that describes the data
- ✓ **Active cell**- selected cell/cell in use

Ms. Office Excel

- **Grade:** We grade basing on average scores or scores of individual subjects
- We use **IF** function to find grades
- We use the lower limits of the grading schemes to find grades

Ms. Office Excel

- Grade scheme: A=100-75, B=74-65, C=64-45, D=44-30, F=29-0
- Principles in using IF function
 - ✓ Letters/characters in Ms. Excel Formula has to be enclosed in double quotation marks eg. "A", "GOOD"
 - ✓ Opened brackets must be closed

Ms. Office Excel

- Formula for finding grades using average scores

=IF(I2>=75,"A",IF(I2>=65,"B",IF(I2>=45,"C",IF(I2>=30,"D","F"))))

- I2 is a cell reference with average scores

- Video live at

<https://youtu.be/cVglMOBSC-8>

12	11	SERAFIN KIMONGE	43	45	43	65	76	272	54	C	11

Ms. Office Excel

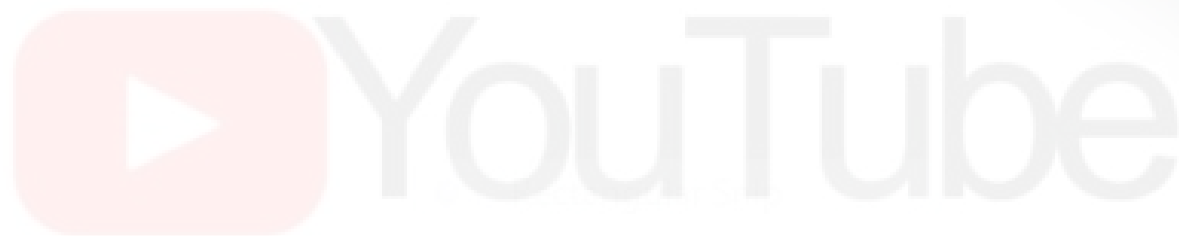

- **Practical task:** Using Experience from Grade formula; write a formula to find remarks
- Remarks should be given basing on grades
 - ✓ A=Excellent, B=Good, C=Average, D=Weak, F=Failed
 - ✓ Video live at <https://youtu.be/cVgIMObSC-8>
- Remember the principles guiding IF function

Ms. Office Excel

- Finding Division: Will be addressed in your project work
- But this video can assist: <https://youtu.be/6vGPqeRG-gc>

Ms. Office Excel

- Counting Grades: Practice this
- Insert COUNTIF function beside A,B,C,D & F respectively

Video live at: <https://youtu.be/oNvbl10-Zs0>

- i. =COUNTIF(J2:J12,"A")
- ii. =COUNTIF(J2:J12,"B")
- iii. =COUNTIF(J2:J12,"C")
- iv. =COUNTIF(J2:J12,"D")
- v. =COUNTIF(J2:J12,"F")

Ms. Office Excel

- Setting table outlines

Ms. Office Excel

- Ms. Excel template: A pre-designed Ms. Excel worksheet with formulae and functions
- Can be given to Ms. Excel less literate user to assist him/her in processing results
- Try to prepare Ms. Excel template with Names, subject titles without marks, total, average, grade, rank etc.
- Try to fill data in it a see how it works

Ms. Office Excel conc

- ❖ 21st C teachers need to be technologically literate (Digital Literacy)
- ❖ Embrace ICT in teaching and learning, assessment, leadership and for your professional development
- ❖ Ms. Excel can assist you in processing students' results, registration of students, procurement, record keeping among others
- ❖ Work as much as you can to develop your skills on the use of Ms. Excel and other applications
- ❖ Thanks for your attention
