Test 02: ET 8209 Object-Oriented Programming

Date 9th June 2024

Instructions

- Answer all questions
- The time allocated for this test is sixty (60) minutes

Question One

What do you understand by the following terms commonly used in object-oriented programming course

- Object class
- Java applets
- Exception handling
- Multiple inheritance
- Java Virtual Machine (JVM)
- Stack trace

[3 Marks]

Question two

- Differentiate interface from abstract. [2 Marks]
- Given the simple interface for accepting student marks and providing corresponding grades according to the table below

Marks	Grade
70-100	A
60-69	B+
50-59	B
40-49	C
0 -39	D

```
Public interface grading {  
    float acceptmarks(float marks);  
    float providegrade (float marks);  
}
```

Create a class that will accept marks and provide student grades

[6 Marks]

Question three

- i. What is the relationship between classes and interfaces? [2 Marks]
- ii. Write an error-free Java program to demonstrate the multilevel inheritance [2 Marks]

[2 Marks]
